Graphic Recording is an innovative set of skills, tools, and techniques useful for capturing, organizing, and presenting information and concepts during a meeting. Since the majority of people are visual learners, it is ideal for helping groups and organizations brainstorm, plan, envision, and create common understanding and consensus. The 101 workshop will provide an opportunity for to learn basic skills in graphic recording and get an introduction to it potential uses. Both workshops are appropriate for anyone responsible for leading and/or documenting the results of meetings and workshops; such as nonprofit staff, board members and volunteer, meeting and conference planners; or consultants wanting to enhance their use of visuals in their consulting. View this YouTube video www.youtube.com/watch?v=efCiPNjEC0I to get a flavor for this unique process.
